

Qi4D TOUR FAIRWAY

FEATURES AND BENEFITS

MATERIAL ADVANTAGE

- Advanced Multi-Material Construction combines the most effective engineering techniques with the finest materials to create one of our longest moveable weight fairways.
- The Titanium Qi4D Tour fairway is designed for golfers who seek the ultimate weapon to conquer long par 5s and to thread the needle of the narrowest of tee shots.

ADJUSTABLE PERFORMANCE

- Utilizing three Trajectory Adjustment System weights (15g x 1 / 4g x 2) provides the golfer the most mass efficient way to adjust shot shape and spin.
- 4° loft sleeve can be used to adjust loft, lie and face angle for optimized flight.

CG OPTIMIZATION

- Engineers were able to improve launch without adding spin due to the use of an ultralightweight titanium body and advanced CAD model simulations. This result is a fairway that is easy to launch with incredible distance from any lie.
- A large 60g tungsten mass pad moves the center of gravity extremely low and forward, creating a hot trajectory for more distance.

REAX™ SHAFTS

- Leveraging Mitsubishi Chemical's industry-leading material expertise and production processes enables us to offer world-class shafts suitable for a diverse range of fairway applications.

TOUR-PROVEN TECHNOLOGIES

- New and improved cut-through Speed Pocket™ protects ball speed and reduces spin on low-face strikes.
- Advanced CAD modeling creates a design with a clean and powerful sound, a foundation of TaylorMade fairway performance.
- Twist Face™ features corrective face curvature is designed to provide straighter shots on mishits.

CLUB	LOFT	HAND	LIE	VOLUME	LENGTH	SW

Qi4D

FAIRWAY

FEATURES AND BENEFITS

PROVEN RECIPE

- TaylorMade Fairways have dominated on Tour for over a decade because of their unique performance recipe, which enables maximum distance and versatility.
- The Qi4D fairway is designed for golfers who want the most advanced technology while still prioritizing versatility and control with amazing distance.

ADJUSTABLE PERFORMANCE

- Utilizing a single Trajectory Adjustment System weight (8g x1) provides the golfer a more mass efficient way to adjust flight, spin and swing weight.
- 4° loft sleeve can be used to adjust loft, lie and face angle for optimized flight and is available in all lofts.

REFINED ATTRIBUTES, BIG CHANGES

- Engineers conducted an objective analysis of all the performance attributes and discovered new methods to enhance performance and confidence.
- Sit points, lie angles, address views, and center of gravity locations were all updated based on Tour feedback and the expertise of leading fitters worldwide, ensuring the optimal fairway across skill levels.

REAX™ SHAFTS

- Leveraging Mitsubishi Chemical's industry-leading material expertise and production processes enables us to offer world-class shafts suitable for a diverse range of fairway applications.

TOUR-PROVEN TECHNOLOGIES

- New and improved cut-through Speed Pocket™ protects ball speed and reduces spin on low-face strikes.
- Advanced CAD modeling creates a design with a clean and powerful sound, a foundation for TaylorMade fairway performance.
- Twist Face™ features corrective face curvature designed to provide straighter shots on mishits.
- Multi-Material Construction allows engineers to maximize performance by increasing discretionary weight.

Qi4D MAX FAIRWAY

FEATURES AND BENEFITS

SPEED THROUGH FORGIVENESS

- The Qi4D Max fairway is designed for golfers who are looking for a fairway that's easy to launch due to a shallower face with maximum forgiveness.
- The massive 200cc head is 17% larger than the Tour model and 5% larger than the standard model, offering a significant confidence boost. It's our mini-mini driver.

BIG SIZE, BIG FORGIVENESS

- Every head in the Qi4D Max fairway lineup has been pushed to its limits in terms of overall size. This helps to push weight to the perimeter, boosting stability and helping off-center strikes fly farther and straighter.
- The rearward placement of the Trajectory Adjustment System weight (8g x1) concentrates mass in the back of the head thereby increasing the overall moment of inertia of the head for added stability and forgiveness.

ADJUSTABLE PERFORMANCE

- Utilizing a single Trajectory Adjustment System weight provides the golfer a more mass efficient way to adjust flight, spin and swing weight.
- 4° loft sleeve can be used to adjust loft, lie and face angle for optimized flight in core lofts (3 and 5 only).

REAX™ SHAFTS

- Leveraging Mitsubishi Chemical's industry-leading material expertise and production processes enables us to offer world-class shafts suitable for a diverse range of fairway applications.

TOUR-PROVEN TECHNOLOGIES

- New and improved cut-through Speed Pocket™ protects ball speed and reduces spin on low-face strikes.
- Advanced CAD modeling creates a design with a clean and powerful sound, a foundation of TaylorMade fairway performance.
- Twist Face™ features corrective face curvature designed to provide straighter shots on mishits.
- Multi-Material Construction allows engineers to maximize performance by increasing discretionary weight.

Qi4D

MAX LITE

FAIRWAY

FEATURES AND BENEFITS

SPEED THROUGH FORGIVENESS

- The Qi4D Max Lite fairway is designed for golfers who are looking for a fairway that's easy to launch due to a shallower face with maximum forgiveness.
- The massive 200cc head is 17% larger than the Tour model and 5% larger than the standard model, offering a significant confidence boost. It's our mini-mini driver.
- For golfers seeking increased clubhead speed, Qi4D Max Lite Fairway is up to 21g lighter than the Qi4D Max Fairway.

BIG SIZE, BIG FORGIVENESS

- Every head in the Qi4D Max fairway lineup has been pushed to its limits in terms of overall size. This helps to push weight to the perimeter, boosting stability and helping off-center strikes fly further and straighter.
- The rearward placement of the Trajectory Adjustment System weight (4g x 1) concentrates mass as far back as possible, thereby increasing the overall moment of inertia of the head.

ADJUSTABLE PERFORMANCE

- Utilizing a single Trajectory Adjustment System weight (4g x1) provides the golfer a more mass efficient way to adjust flight, spin and swing weight.
- 4° loft sleeve can be used to adjust loft, lie and face angle for optimized flight in core lofts (3 and 5 only).

REAX™ SHAFTS

- Leveraging Mitsubishi Chemical's industry-leading material expertise and production processes enables us to offer world-class shafts suitable for a diverse range of fairway applications.

TAYLORMADE PROVEN TECHNOLOGIES

- New and improved cut-through Speed Pocket™ protects ball speed and reduces spin on low-face strikes.
- Advanced CAD modeling creates a design with a clean and powerful sound, a foundation of TaylorMade fairway performance.
- Twist Face™ features corrective face curvature is designed to provide straighter shots on mishits.
- Multi-Material Construction allows engineers to maximize performance by increasing discretionary weight.

FAIRWAY

FEATURES AND BENEFITS

SPEED THROUGH FORGIVENESS

- The Qi4D Max Lite fairway is designed for golfers who are looking for a fairway that's easy to launch due to a shallower face with maximum forgiveness.
- The massive 200cc head is 17% larger than the Tour model and 5% larger than the standard model, offering a significant confidence boost. It's our mini-mini driver.
- For golfers seeking increased clubhead speed, the ultralight spec package provides the Qi4D line's lightest head mass, shaft and grip.

BIG SIZE, BIG FORGIVENESS

- Every head in the Qi4D Max fairway lineup has been pushed to its limits in terms of overall size. This helps to push weight to the perimeter, boosting stability and helping off-center strikes fly further and straighter.
- The rearward placement of the Trajectory Adjustment System weight (4g x 1) concentrates mass as far back as possible, thereby increasing the overall moment of inertia of the head.
